

Got Speed?

Switch lane to fastest live broadcasting.

ATEN Seamless Switch™ Series – Modular Matrix

The answer to your need for speed.

The secret to ATEN's seamless video switching is the seamless engine implemented at every output port that enables real-time video streaming without delays, while the Scaler function takes advantage of efficient hardware processing to achieve quick and precise screen collaboration in various formats for large-scale A/V operations. The plug-n-play modular board simplifies installation and maintenance, which contributes to overall system reliability and cost-effective management.

Fastest video switching

Perfect video wall integration+Scaler

Smart profile scheduling

Expandable installation via I/O Board
