

0.3M HDMI TO VGA +USB-AUDIO CABLE (VE718)

Introductions

Integrated the HDMI source to convert to the VGA displays with Audio. When it is processing the HDMI signals, it does not execute the Scaler processing, so the highest resolution can up to 1920 x 1080. Support more resolutions, good compatibilities, high definitions. This offers solutions for digital entertainment such as HDTV, STB, DVD, Projectors and much more. The power is supplied via the USB connection.
